

Abstract of the Disclosure

The present invention relates to novel crystalline forms of 11-cyclopropyl-5, 11-dihydro-4-methyl-6H-dipyrido[3,2-b: 2', 3'-e][1,4]diazepin-6-one, generically known as Nevirapine, and processes for making thereof. More specifically, the present invention provides novel crystalline Form-II and Form-III of Nevirapine.
